trueMINER™ is an enterprise cloud solution that supports the streamlined management of the entire spectrum of resource-based companies from land management, exploration activities, permits, tenure management, any type of agreements, GIS and more.

INNOVATIVE
**LAND MANAGEMENT
CLOUD SOFTWARE**

www.trueminer.com

INNOVATIVE SOFTWARE THE SUCCESS OF YOUR RESOURCE PROJECTS

Our cloud solution is designed to integrate the flow of information between land management, agreements, permits and properties, financial, and projects information in one centralized location.

The flexibility of *trueMINER*™ enables dynamic configuration and secure data management. *trueMINER*™ provides configurable reporting and informative dashboard displays, enables timely and effective decision-making regarding tenures, properties, related regulatory development and financial obligations, and coordinates projects with tight deadlines and alerts.

INTRODUCING NEW GENERATION ONLINE SOFTWARE

With leading edge technologies, *trueMINER*™ dynamically tracks all exploration activities for startups, mid-size and major resource-based companies. It manages resource project data from exploration, development to production through a common, responsive platform.

Highly configurable and scalable, and paired with a responsive web design approach, *trueMINER*™ provides optimal viewing and interaction across a wide range of devices.
